

CircuitFit Beta User Feedback Summary

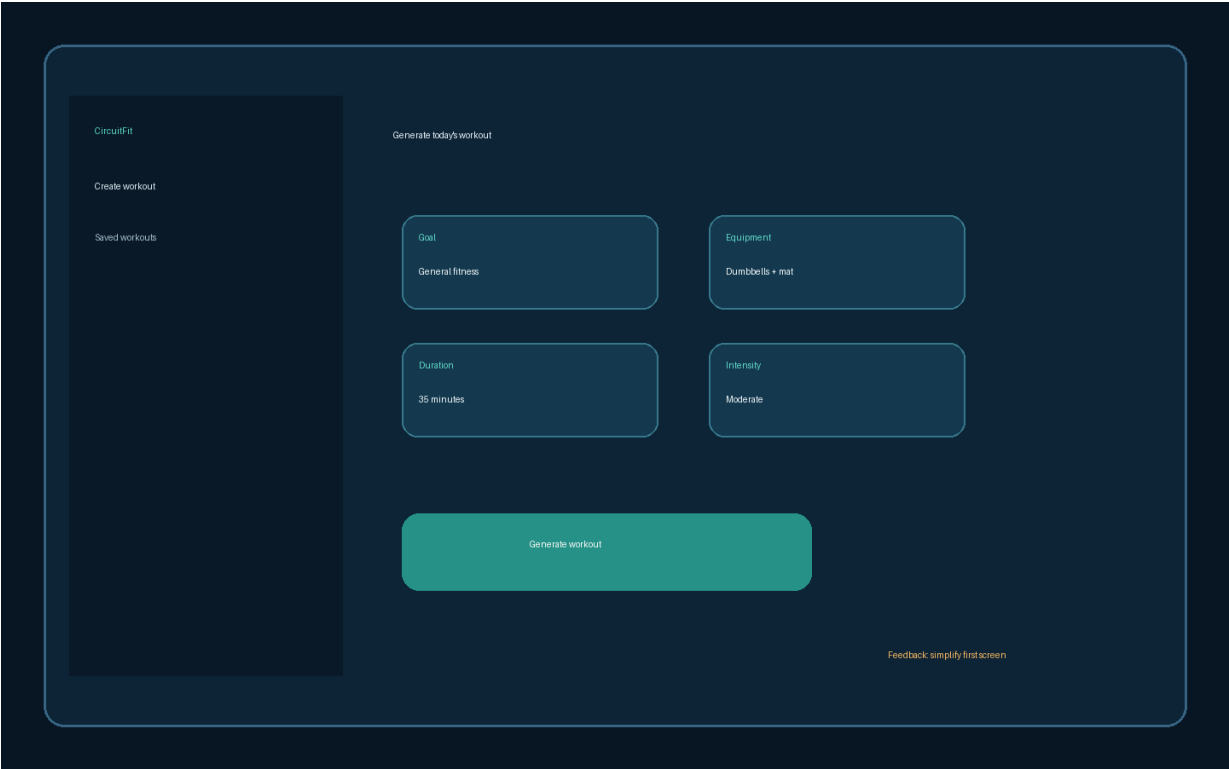

Synthetic evidence fixture - generated for local ingestion testing

Executive summary

Five synthetic beta users reviewed the mobile-browser concept. The dominant request was to reduce friction on the first screen. Users accepted browser-local saved workouts for an MVP, but two participants asked for export/import. One participant requested wearable heart-rate guidance. This request is not yet approved.

Feedback ID	Theme	Evidence	Disposition
FB-001	Reduce first-screen choices	3 of 5 users	MVP design change
FB-002	Save workout after refresh	4 of 5 users	MVP acceptance criterion
FB-003	Export/import saved workouts	2 of 5 users	Needs product review
FB-004	Wearable heart-rate zones	1 of 5 users	Out of MVP unless approved

Review note: visual feedback is informative but should not silently amend the approved MVP baseline.
